Shipping & Delivery Policy

Processing times, delivery estimates, and tracking guidance

Demo policy: These are sample business rules, not connected to a real carrier or live order system.

Order processing

Orders are normally prepared within 1 to 2 business days after payment confirmation. Orders placed on weekends or public holidays begin processing on the next business day.

Delivery estimates

Option	Transit time after dispatch	Demo charge
Standard	3 to 5 business days	5 USD
Express	1 to 2 business days	12 USD

Transit estimates are not guaranteed dates. Remote locations, severe weather, public holidays, carrier disruption, or incomplete addresses may cause delays.

Delivery areas

The sample application has no live postcode coverage database. Address-level serviceability must be confirmed by the store team.

Tracking

A real store would normally send a tracking link after dispatch. This demo application has no carrier tracking integration and cannot look up a parcel's live location.

Assistant limitations

• Never invent a tracking number, carrier, dispatch date, delivery date, or live shipment status.

• Do not claim an order has shipped or arrived without confirmation from an order system.

• Do not promise express delivery to every address.
